Commercial Lifecycle Transition & Executive Overview

October 2026 · Executive Review — Aligning MVS ICT & Telecom with the Corporate Operational Blueprint

◆ THE EXECUTIVE DIRECTIVE: DUAL-REGISTER ARCHITECTURE

- **The Problem with Legacy Daily Logs:** Traditional sales logs required tedious micro-logging of everyday sales visits. Sales engineers spent time typing routine diary notes rather than driving commercial velocity.
- **Dual-Register Foundation (Asayil Sheet Baseline):** MVS operations split cleanly into 2 interconnected modules: (1) 'Projects Under Study Register' for pre-pricing & RFP evaluation, and (2) 'Priced Projects Register' for live commercial tracking.
- **Strict 5-Stage Decision Gatekeeper:** Sales owners must classify deals into 5 strict stages: (1) Information Gathering, (2) Under Review, (3) Pricing in Progress, (4) Quotation Submitted, (5) On Hold.
- **End-to-End Cash Realization Lifecycle:** Under Study ➔ Submission Date ➔ Quotation Status ➔ PO Award ➔ Execution Duration ➔ Invoicing ➔ Cash Collection.

◆ EXECUTIVE OUTCOMES DELIVERED TO LEADERSHIP

1. Zero Lost Tenders & Missing Information Control

Standardized Missing Information tracker (BOQ, Specs, Budget, Drawings) ensures zero incomplete quotations are released. 5-stage gate stops deals from stalling.

2. Pre-Sales Technical Accountability & Execution Window

RFP compliance matrices are locked to designated Sales Owners. Captures 'Estimated Execution Duration' prior to operational handover, preventing delivery disputes.

3. 3 Dedicated Dashboards: Quotation, PO & Collection

Leadership gets instant clarity via 3 live executive command tabs: Quotations status, PO award conversion %, and Billing vs. Actual Cash Collection (SAR).

The 7-Stage End-to-End Commercial Lifecycle

October 2026 · Executive Review — From Project Study & Missing Info to Quotation Submission, PO Award & Cash Collection

1. Pre-RFQ / RFP
Lead & Intake

- **Sales Owner**
  Assigned sales engineer.
- **Client & Contact**
  Name, Entity, Designation.
- **Missing Info**
  Scope, BOQ, Drawings, Budget.
- **5 Decision Gates**
  Gathering, Review, Pricing...

2. RFQ / RFP
Technical Prep

- **Submission Date**
  Official customer deadline.
- **Routing Type**
  Fast RFQ vs Technical RFP.
- **Tech Pack**
  Datasheets & Compliance.
- **Pricing & VAT**
  Commercial evaluation SAR.

3. Quotation
Commercial Offer

- **Quotation No.**
  Official MVS Quote reference.
- **Quote Status**
  Open, On Hold, Approved...
- **Price Validity**
  Validity expiration clock.
- **Commercial SAR**
  Margin & total pricing lock.

4. Follow-up
Negotiation

- **Client Response**
  Scope & pricing discussion.
- **Aging Clock**
  Flags inactive quotes > 10d.
- **Win Probability**
  High / Medium / Tender rate.
- **Next Step Log**
  Action & follow-up date.

5. PO Award
Contract Won

- **PO Status**
  Open, Approved, Closed...
- **PO Number**
  Verified customer PO code.
- **Execution Window**
  Est. Execution Duration locked.
- **Resp. Person**
  Handover to Operations lead.

6. Invoicing
Billing Event

- **Invoice No.**
  Official tax invoice logged.
- **Invoice Date**
  Tax date & terms tracking.
- **Billed SAR**
  Progress milestone amount.
- **Invoice Status**
  Not Invoiced, Partial, Paid.

7. Collection
Cash Realized

- **Collection Date**
  Exact bank receipt date.
- **Collected SAR**
  Realized cash in bank.
- **Collection Status**
  Pending, Partial, Collected.
- **Outstanding Bal.**
  Residual receivables tracking.

CRITICAL DISTINCTION
RFQ vs. RFP

Tailored workflows prevent technical bottlenecks and ensure zero bid disqualification.

◆ Standard RFQ (Commercial Inquiry)

- Straightforward Bill of Materials (BoQ) or box-moving products (e.g. VIAVI units, Jetting tools, standard cabinets).
- Pre-Sales action: Rapid price check with vendor ➔ Issue commercial quotation within 24-48 hours.
- Minimal technical documentation required — optimized for fast turnaround.

◆ Technical RFP (Tender / Complex Solution)

- Comprehensive turnkey projects (Low Current, Telecom infrastructure, custom enterprise deployments).
- Pre-Sales action: Rigorous technical compliance matrix, engineering datasheets, client vendor approvals.
- Technical sign-off required prior to releasing commercial quotation to eliminate contractual risk.

Strategic Value-Adds & Management Controls

October 2026 · Executive Review — How the System Protects Revenue, Eliminates Chasing & Solves Real Sales Bottlenecks

1. 5-Stage Decision Gate & Missing Info Engine

- **The Challenge:** Projects sit in limbo because sales engineers forget what information is missing from the client.
- **The Solution:** Mandatory 5-stage gate (Information Gathering ➔ Under Review ➔ Pricing ➔ Submitted ➔ On Hold) paired with a Missing Info checklist (Scope, BOQ, Drawings, Budget).
- **Executive Benefit:** Executive leadership gets an instant filter on proposal bottlenecks without micromanaging daily sales notes.

2. Execution Duration & Responsible Person Handover

- **The Challenge:** Once a PO is signed, sales moves on and delivery timelines are unclear to Operations and Finance.
- **The Solution:** System locks 'Estimated Execution Duration' and designates a 'Responsible Person' at the exact point of PO award before commercial handoff.
- **Executive Benefit:** Clear accountability bridges the gap between commercial sales and operational site delivery.

3. 3 Dedicated Command Dashboards (Quotes · POs · Collections)

- **The Challenge:** Executives are overwhelmed when quotations, won orders, and unpaid invoices are dumped into a single cluttered sheet.
- **The Solution:** 3 dedicated live executive dashboard tabs: (1) Quotations (Volume & Approval Rate), (2) Purchase Orders (Conversion % & Value), and (3) Invoicing & Collection.
- **Executive Benefit:** Executive decision-makers can jump straight to their relevant focus area with automated status breakdowns and visual charts.

4. Realized Cash Collection & Debtor Aging (Cashflow Focus)

- **The Challenge:** Winning a PO is meaningless if billed invoices remain uncollected for 90+ days in the market.
- **The Solution:** System tracks every billed invoice against exact Collection Dates, Collected Cash (SAR), and Outstanding Receivables with automated collection status.
- **Executive Benefit:** Gives executive leadership immediate clarity on realized liquidity, bank deposits, and client overdue debts.

System Recommendations to Accelerate Sales & Cash Velocity

October 2026 · Executive Review — High-Impact Enhancements to Protect Revenue, Expand Pipeline & Maximize Win Rates

1. Win / Loss Analytics & Competitor Pricing

- **Core Enhancement:** Mandatory structured outcome reason required for all closed deals: Competitor Price, Technical Specs, Client Budget Shelved, or Delayed Bid.
- **Impact on Sales:** Provides exact market intelligence on why tenders are won or lost, preventing recurring commercial bidding mistakes.
- **Executive Benefit:** Equips executive management with objective quarterly data to fine-tune vendor discount requests and product margins.

2. Government Tender & Portal Tracking (Etimad / STC)

- **Core Enhancement:** Mandatory 'Tender / Portal Ref #' field in Study Register linked to Etimad, STC Rawafed, and Aramco Ariba portals.
- **Impact on Sales:** Ensures technical submission deadlines, query periods, and bid bond validities are never missed on high-value public tenders.
- **Executive Benefit:** Systematic pipeline capture of Saudi Vision 2030 megaprojects with structured milestone alerts.

3. Retention Money & Milestone Balance Visibility

- **Core Enhancement:** Dedicated 'Retention Balance (5-10%)' tracker separating contractual warranty retentions from aged overdue receivables.
- **Impact on Sales:** Enables sales engineers to trigger automatic release claims immediately upon project handover & PAC / FAC issuance.
- **Executive Benefit:** Gives executive leadership and Finance accurate visibility of true realizable cashflow vs. deferred contract holdbacks.

4. Fast-Track RFQ Automation & Vendor Pricing Library

- **Core Enhancement:** Pre-approved price list & margin templates for standard volume products (VIAVI test kits, Jetting tools, standard cabinets).
- **Impact on Sales:** Cuts standard quotation turnaround from 48 hours down to under 2 hours, winning deals before competitors respond.
- **Executive Benefit:** Dramatically increases quotation volume, win ratios, and sales velocity without increasing administrative overhead.

Implementation Roadmap & Immediate Next Steps

October 2026 · Executive Review — Phased Fast-Track Rollout, Live Pilot Integration & Executive Decision Matrix

Phase 1: Dual Registers
Week 1 (Immediate)

- **Projects Under Study**
  5-stage decision gates, missing info engine & sales owner assignments.
- **Priced Projects Register**
  Submission date, pricing with VAT calculation, quote validity countdown.
- **Quotation Status Tracker**
  Standardized dropdown status workflow (Open, On Hold, Approved, Cancelled).

Phase 2: Cash & Execution
Week 2

- **PO Award & Duration**
  Customer PO verification, locked Execution Duration & ops handover.
- **Milestone Invoicing**
  Tax invoice registration, milestone tracking, and payment terms.
- **Collection Tracker**
  Realized cash received (SAR), bank collection dates & pending receivables.

Phase 3: Executive Dashboards
Week 3

- **Quotation Dashboard**
  Total quoted value, live pipeline counts & win/loss approval rate %.
- **PO & Order Dashboard**
  PO volume, contractual value, and Quotation-to-PO conversion %.
- **Collection Command Tab**
  Live billed vs realized cashflow, debtor aging & 1-Click executive PDF.

Phase 4: Pilot & Launch
Week 4

- **Live Data Migration**
  Import active proposals from existing project register & open client RFQs.
- **Sales Team Enablement**
  30-min hands-on walk-through showing frictionless updates (zero diary logs).
- **Leadership Sign-Off**
  MVS ICT & Telecom goes live as primary commercial command center.
