Version 2.0 • Commercial & Cashflow Update

MVS CONFIDENTIAL • INTERNAL USE ONLY

1 Executive Summary

Modern Vision Solutions Ltd is expanding its commercial footprint across major enterprise infrastructure and technology contracts, actively delivering **Seven Entertainment**, **Salam CCS**, and the **Dune Corridor Project (DCP)**. Engineered with an extensible multi-project core, the platform provides **instant onboarding for any new contract (Track 4+)** as soon as a quotation is won or a PO is awarded. In direct response to recent executive directives from the **Chief Executive Officer**, this upgraded system architecture establishes a unified corporate command platform integrating three vital business pillars:

Sales Pipeline	Field Execution	Executive Summary	Cash Flow Control
Quotations, closings & win rates	Milestones, progress % & blockers	PO value, invoiced, received & remaining	Petty cash, purchases & allowances

CEO Directive Alignment: The system incorporates a dedicated **Sales Pipeline Tracker** (quotation numbers, client opportunities, quote values, and closing forecasts), built with open architecture to seamlessly adapt to the CEO's designated reporting template. Simultaneously, it introduces an **Executive Financial Summary** coupled with daily **Cash Flow Governance** (petty cash logs, site purchases, and technician allowances).

In-House Advantage: Developed internally by MVS IT utilizing high-performance enterprise PHP (Laravel) + MySQL. **Zero recurring software subscription fees**, with Phase 1 operational deployment delivered within **4 weeks** of executive sanction.

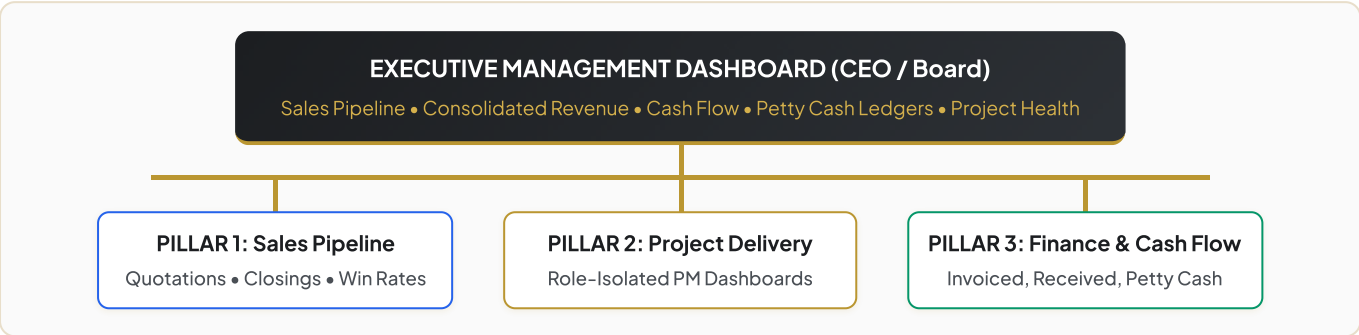

2 Current Operational Challenges & Bottlenecks

CURRENT BOTTLENECK	IMPACT ON OPERATIONS, SALES & CASH FLOW
No Central Sales Pipeline for Quotations	Quotations and expected closings are scattered across emails and offline sheets; future incoming revenue is difficult to forecast accurately.
Fragmented Field Updates Across Projects	Site progress across Seven Entertainment, Salam CCS, Dune Corridor (DCP), and newly acquired projects lacks a standardized reporting cadence, delaying consolidated management reporting.
Manual Reconciliation of Invoicing & Cash Receipts	Difficult to instantly see the real-time gap between Total PO Value, Certified Invoices, Collected Cash, and Overdue Client Receivables.
Unstructured Site Petty Cash & Purchases	Site cash expenditures, urgent purchases, and vendor receipts are logged retrospectively, risking cash leakage and budget overruns.
Untracked Site Allowances & Field Logistics	Technician per-diems, lodging, travel, and site allowances are disconnected from the specific project cost ledger.
Late Detection of Blockers & Material Delays	Site constraints and client approvals reach executive leadership only after project delivery dates have been compromised.

3 System Architecture & The 3-Pillar Model

The system is engineered as an encrypted web portal accessible across desktop workstations, tablets, and smartphones. It establishes a unified operational pipeline from lead acquisition to project closeout:

Pillar 1: Sales Pipeline

- **Quotation Registry:** Central logging of Quote #, Client, Scope, and Date.
- **Expected Closings:** Projected close date and probability weighting (SAR).
- **Status Stages:** Lead → Quoted → Negotiation → Won → Contract.
- **Flexible Data Ingestion:** Formatted to adopt CEO's template layout.

Pillar 2: Field Delivery (PMs)

- **Strict Data Isolation:** PMs view and update only their assigned project.
- **Active Tracks:** Seven Entertainment, Salam CCS, and Dune Corridor (DCP).
- **Track 4+ Ready:** 1-click addition of new projects with custom milestones.
- **Blocker Logging:** Rapid escalation of site bottlenecks and client hold-ups.

Pillar 3: Cash Flow Hub

- **Executive Summary:** PO Value, Invoiced, Received, and Remaining.
- **Petty Cash Sub-Ledger:** PM cash issuance, vouchers & receipt verification.
- **Purchases & Materials:** Local vendor bills & emergency site supplies.
- **Allowances:** Technician per-diems, transport, accommodation & labor.

3.4 Automated Executive Reporting & Alerts

- **CEO Weekly Flash Report:** One-page PDF generated every Thursday night summarizing new quotations won, invoiced amounts, cash collected, and open receivables.
- **Cash Outflow Monitoring:** Instant warning when a site PM's petty cash or site purchase burn rate exceeds baseline project allowances.
- **Aged Receivables Flag:** Automated notification for certified client invoices outstanding beyond 30, 60, or 90 days.

T: +966 536 700 701 / +966 506 586 534 **E:** info@mvsksa.com • www.mvsksa.com **A:** Al Rashid Tower, King Saud Rd, Riyadh, KSA

4 Commercial & Executive Modules (CEO Focus)

4.1 Sales Pipeline & Quotation Management Module

To eliminate quotation blindness and provide reliable commercial forecasting, all business opportunities are registered under a unified sales pipeline:

QUOTATION #	CLIENT / PROJECT OPPORTUNITY	VALUE (SAR)	EXPECTED CLOSING	WIN PROB.	STATUS
MVS-QT-2026-088	Seven Entertainment – Phase II Expansion	SAR 1,850,000	End of Oct 2026	85%	NEGOTIATION
MVS-QT-2026-092	Dammam Municipality – Gate Sensors	SAR 420,000	Mid Nov 2026	70%	QUOTED
MVS-QT-2026-095	Cinema Tech – DCP Multi-Hall Upgrade	SAR 960,000	Nov 2026	90%	WON / AWARDED
MVS-QT-2026-101	Riyadh Commercial Complex – Fiber Cabling	SAR 640,000	Dec 2026	40%	LEAD / REVIEW

Adaptability to CEO Template: The module architecture is designed with custom field mapping. As soon as the CEO provides the finalized Excel or document format, the table structure will be customized to mirror the exact column names, formulas, and stage codes requested.

4.2 Executive Financial Summary (Portfolio Level)

Consolidated macro view giving the CEO real-time clarity over contract values, billed revenue, bank receipts, and pending receivables across all operations:

PROJECT SCOPE	CONTRACT VALUE	INVOICED TO DATE	RECEIVED (CASH)	REMAINING TO BILL	OVERDUE RECEIV.
Track 1: Seven Entertainment	SAR 2,450,000	SAR 1,470,000 (60%)	SAR 1,120,000	SAR 980,000	SAR 350,000 (45d)
Track 2: Salam CCS	SAR 1,100,000	SAR 770,000 (70%)	SAR 660,000	SAR 330,000	SAR 110,000 (20d)
Track 3: Dune Corridor Project (DCP)	SAR 850,000	SAR 340,000 (40%)	SAR 340,000	SAR 510,000	SAR 0 (Current)
Track 4+: New Awarded Projects	*+ Instant Modular Integration: Automatically populated into Financial Summary upon PO award*				
TOTAL PORTFOLIO	**SAR 4,400,000**	**SAR 2,580,000**	**SAR 2,120,000**	**SAR 1,820,000**	**SAR 460,000**

- **Remaining Revenue Pipeline:** Contract Value minus Invoiced Amount — indicates certified revenue yet to be earned upon milestone completions.
- **Cash Collection Efficiency:** Realized cash received vs certified invoices issued (identifying bottlenecks with client finance departments).

T: +966 536 700 701 / +966 506 586 534 **E:** info@mvsksa.com • www.mvsksa.com **A:** Al Rashid Tower, King Saud Rd, Riyadh, KSA

5 Cash Flow & Site Expense Governance

To eliminate informal site cash handling and give executive management total transparency over operational outgoings, the system incorporates four dedicated expense modules:

EXPENSE STREAM	OPERATIONAL WORKFLOW & CONTROLS	MANAGEMENT IMPACT
1. Site Petty Cash Float	Assigned to site PM (e.g. SAR 5,000 float). Each expenditure requires digital voucher entry + receipt photo upload. Replenished only upon Accounts review.	Prevents untracked site spending; real-time running balance visible to CEO.
2. Materials & Purchases	Emergency tools, consumable cables, hardware brackets, fittings, and local vendor supplies logged with tax invoice copies.	Distinguishes budgeted project procurement from unplanned site purchases.
3. Site Allowances & Per-Diems	Technician food allowances, out-of-town per diems, lodging, site transportation, and emergency overtime labor payouts.	Enforces approved company allowance caps per person per day.
4. Net Operational Cash Flow	Compares Cash Inflows (client collections) against Cash Outflows (petty cash + vendor purchases + labor allowances) per project.	Ensures every active project remains cash-flow positive during execution.

Progress Measurement Framework by Project Type

PROJECT TRACK	PRIMARY PHYSICAL METRIC	FINANCIAL & BILLING MILESTONE
Track 1: Seven Entertainment	Linear meters of cabling pulled (m) vs scheduled layout; cinema containment & terminations.	Certified interim inspection certificate (IPC) submitted per completed hall / zone.
Track 2: Salam CCS	Hardware delivery → CCS network connectivity → System integration → Client acceptance.	20% advance → 40% delivery → 30% testing & integration → 10% final PAC.
Track 3: Dune Corridor Project (DCP)	DCP units delivered, calibrated, audio-visual testing completed, and handed over.	Invoice certified upon client acceptance sheet sign-off per cinema hall.
Track 4+: New Projects	**Configurable Metrics Engine:** Linear meters, equipment units, civil stages, or % completion.	Custom milestone billing schedule mapped directly from client PO terms.

Dual Reconciliation (Field & Finance): Project Managers submit physical progress and site expense vouchers from mobile devices. The Accounts Department validates bills and reconciles payments, ensuring the CEO sees 100% verified data at all times.

T: +966 536 700 701 / +966 506 586 534 **E:** info@mvsksa.com • www.mvsksa.com **A:** Al Rashid Tower, King Saud Rd, Riyadh, KSA

6 Strategic Benefits & Role Governance

1. **Total Commercial Visibility**
   Live tracking of all submitted quotations, expected closing dates, and win pipeline.
2. **Accelerated Cash Collections**
   Instant alert for aged receivables (30/60/90+ days), preventing client payment delays.
3. **Rigid Petty Cash Control**
   Every site Riyal accounted for with digital vouchers, receipts, and audit verification.
4. **Role-Isolated Confidentiality**
   PMs access only their project; executive financial margins remain confidential.

7 Role-Based Access Matrix

USER ROLE	ACCESSIBLE SCOPE	PERMITTED SYSTEM ACTIONS
CEO / Executive Board	Entire Company Portfolio (All Projects & Quotations)	Full visibility, quotation approval, budget setting, cashflow audit, all reports
Sales & Estimation	Sales Pipeline & Quotation Register	Log new quotations, update client closing status, record win/loss rationale
Project Managers (PM)	**Assigned Project ONLY**	Submit milestone progress %, log petty cash vouchers, upload receipts, report risks
Accounts Department	Financial Invoicing & Cash Flow Hub	Record client payments, certify tax invoices, approve petty cash replenishments

8 Implementation Roadmap

Phase 0	**Data Audit & CEO Format Setup:** Collate POs, active contracts, and adopt the CEO's designated Sales Pipeline format. Establish project baselines.	1 Week
Phase 1 (MVP)	**Core Platform & 3 Pillars:** Sales Pipeline tracker, PM milestone entry, Executive Financial Summary, and Petty Cash/Purchases logging engine.	3–4 Weeks
Phase 2	**Automated Reporting & Forecasts:** Automated weekly PDF executive brief for CEO, aged receivables analysis, and cash flow projections.	1–2 Weeks

Target Delivery for Operational Platform (Phase 0 + 1): **4 Weeks from Sanction**

T: +966 536 700 701 / +966 506 586 534 **E:** info@mvsksa.com • www.mvsksa.com **A:** Al Rashid Tower, King Saud Rd, Riyadh, KSA

9 Resource Impact & Zero Software Cost

COMPONENT	SPECIFICATION & CORPORATE ADVANTAGE
Software Development	**100% In-House by MVS IT:** Zero software licensing, vendor fees, or consultant retainers.
Technology Stack	Laravel (PHP 8.2) + MySQL • Robust, enterprise-grade, industry-standard data protection.
Hosting & Deployment	Hosted securely on internal MVS office server or private VPS cloud with automated daily backup.
PM Time Commitment	Requires only 10–15 minutes weekly per PM via mobile form; immediate time-saving vs manual Excel.

10 Key Decisions & Inputs Required from CEO

1. **Sales Pipeline Template:** Share the preferred quotation & closing format to finalize column structures.
2. **Formal Sanction:** Approval to initiate Phase 0 data baseline collation and Phase 1 platform setup.
3. **PM Nominations:** Confirm appointed project owners for Seven Entertainment, Salam CCS, Dune Corridor Project (DCP), and designate managers for incoming Track 4+ projects.
4. **Petty Cash Limits:** Establish standard site petty cash float amounts (e.g. SAR 5,000 / project).
5. **Accounts Collaboration:** Nominate an Accounts representative to support initial PO and invoice data entry.

11 Next Steps

Upon executive green light, IT will initiate Phase 0 immediately, configure the database with the CEO's pipeline format, and deliver the working prototype for CEO review in 4 weeks.

Respectfully submitted for executive review and approval. Modern Vision Solutions Ltd — Internal Technology Initiative.
